Brief History

Diba Tensile Architecture was established in Tehran, Iran, in August 2005 and is specialized in the field of Membrane Structures.

So far the company has finished many projects in different cities of Iran.

Diba Tensile Architecture is the first Iranian company which uses expertise, latest methods and knowledge with cooperation of an specialized group that does the design, manufacturing and installation of Membrane Structures.

A Message From DIBA

There's a rich background on “Fabric or Membrane Structures” in our country which is still seen in our nomad tribes nowadays. Despite the background, this industry is barely seen in our modern architecture. Therefore we decided to make the membrane structure systems more dominant in our architecture. Taking advantage of our country's history and the global widespread technology and knowledge of tensile or membrane Architecture, we look forward to see that happen.

With an expert team and a remarkable knowledge profile, Diba wishes not only to offer a high quality service to the clients, but also to spread the modern knowledge of membrane structures in the country.

Scope of Services

Diba's focus is on Design, Fabrication and Construction of Membrane Structures.

In detail, our range of activities comprises the following:

- Consulting
- Design
- Engineering
- Project Management
- Fabrication of Fabric, Steel and Accessories
- Installation
- Lighting
- Maintenance
